Professional Summary

Multidisciplinary professional with a strong academic background in systems and marketing, specialized in full stack development, UX/UI design, and process automation. Proven experience delivering high-impact digital solutions in media, education, music, and fintech sectors. Skilled in modern technologies such as React, Node.js, Symfony, Laravel, Docker, Firebase Studio, and AI-powered tools like Cursor.

Known for translating business logic into scalable technical solutions and collaborating effectively with cross-functional teams. My approach combines clean architecture, clear documentation, and product vision—making me an ideal candidate for agile environments and forward-thinking projects.
